March 18 or 19 work the best for us

>>> "Vaughn, Stephanie" <Vaughn.Stephanie@epa.gov> 3/5/2013 2:33 PM >>>

Hi Rob,

We'd like to set up 2 calls in the next week or two:

1. A post-high flow CWCM sampling call, to go over logistics for future events, what worked, what didn't work, how to decide go/no go, etc.
2. A call with your analytical people (I assume) to go over how your analysis of the High Volume CWCM samples went, any lessons learned, etc., to help LBI and CDM prepare. Also, when will we be receiving this data?

I'm generally available next Wednesday afternoon, next Thursday until 3:00, and Monday or Tuesday the following week (the 18th or 19th).

Let me know what might work for you and we'll try to set these up.

Also, when we discussed the SSP2 locations the first time, you showed us some GIS layers that we requested. Could you send these to me?

Thanks,
Stephanie
